The Barony of Vatavia Presents

Carnivale!

Come join in a day of feasting, revelry, fighting, and good hearted fun! The year is 1513 and it is time for the annual Carnivale of Venice. However there is more than meets the eye at Carnivale for Paupers and Nobles alike are in disguise. Fights between masked assailants have occurred randomly throughout the streets, so beware! The Doge has called for a grand festival this day and wishes to invite you all to the Masked Ball, live musicians will be on hand. He would also like to mention that all refreshments and food will be provided throughout the day at no charge. To help those new to Venice get into the theme, several A&S classes will be conducted to help you make a mask befitting your desires should you not have one constructed prior to arrival. While attending Carnivale we hope that you hide influences or symbols that denote rank as the theme is a "blending of the classes."
